TIRED OF BIKES EVERY-WHERE?

Or getting it stolen or vandalized, then read this!

BICYCLE CULTURE IS CHANGING THE CITYSCAPE

Denmark is Europe's second largest biking nation, this combined with many new heavier and larger bike types such as electrical and cargobikes, is creating the need for investment in how we manage bikes in the cityscape.

A BICYCLE LIFT THAT CATERS TO THE BIKES OF TODAY

AND IS CUSTOMIZED YOUR LOCATION!

As several larger and heavier bicycles are taken in, we are seeing an increasing demand for lifts to transport them up and down bicycle basements as they have become too heavy to just utilize the slush. Not only does it beautify and create more space in the cityscape, it is also a great idea when it comes to maintenance and securing your bike against theft.

Our bicycle lift is adapted to the individual installation location - and is suitable for today's bikes which include electric, charging bikes, and bicycles with trailer etc.

For nonbinding consutancy or an inspection of your property, we can be contacted on 48 36 54 00 or by email info@hydro-con.dk. Or visit us at www.hydro-con.dk
